Travelly

AI Travel App

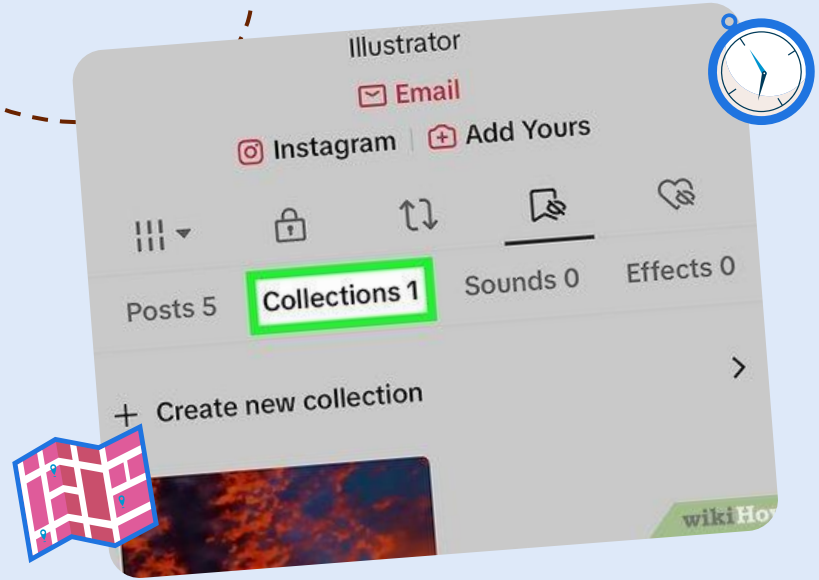

01 The Problem

Problem

TikTok users save lots of videos to look back at later but never do, especially for travel recommendations due to:

- The number of videos saved
- Effort required to look up each mentioned destination
- All saved videos get mixed up

TikTok collections?

Makes it easy to separate travel related content, but still requires lots of effort to go through each video and note down every recommended beach, restaurant, tourist attractions, etc...

02

Our Process

Finding out About the Users

Interviews

- A
  - Use Collections
  - Don’t Use Collections

Personal Experience

Observing Friends

- B
  - Go Back to Saved Videos
  - Don’t go Back

Target Market

Name Taylor
Age 27
Occupation Influencer
Location Toronto

Bio

Taylor is a Gen Z traveler who saves TikToks for vacation inspo. She loves adventures, but hates the hassle of organizing trip details. She wants tools to turn content into real plans.

Technology

Social Media **90%**

Travel Planning Apps **50%**

Goals

- Find hidden gems
- Plan with friends
